Engtek Manoeuvra Systems Pte Ltd offers a complete Propulsion System product line based on Electric Poded Technology using custom built integral electric pod. Units are offered as main propulsion fixed, azimuthing main propulsion, transverse thruster systems and the azimuthing retractable thruster systems;

**Owner/Operator benefits:**
- Propeller speed is independent of engine speed leading to better maneuverability.
- Increased cargo capacity or reduced vessel size
- Increased propulsion system efficiency
- Increased propulsion system redundancy and power availability
- Reduced total installed power generation
- Reduced noise & vibration levels
- Reduced vessel turning circle

**Shipyard & Construction benefits:**
- Flexible machinery arrangement
- Modularized design
- Simpler vessel machinery installation
- Simpler hull form and structure
